

Canvas News

- Blackboard (Bb) Learn Summer 2021 and Fall 2021 content will be migrated to Canvas this month.
 - Later this spring, a course import request form will be available for faculty to request the migration of Bb courses taught before Summer 2021.
- Canvas Support will email an announcement when migration is complete along with information on how to request a *temporary course shell*.
 - These “temp shells” may be used for familiarizing yourself with Canvas and for building your Summer and Fall 2022 courses. The content from temp shells can be later imported into your Canvas Banner course(s) (available in April).
 - Bb migrated content will be read-only, but it is accessible and moveable to your temp shell.
- In April, Summer 2022 and Fall 2022 Banner courses will be available in Canvas.
 - You may import your migrated course content and/or your temp shell content into your new Canvas course, but some cleanup for migrated content will be required.
 - A migration cleanup checklist will be made available.
- Access to Bb Learn ENDS
 - Students: mid-June 2022
 - Faculty: TBD (no earlier than end of August 2022)
- Resources
 - UNM Center for Teaching and Learning (CTL) is providing free one-week (Weds-Weds) asynchronous *Bridge to Canvas* courses for UNM faculty starting Feb 16. These will be offered weekly. Completing the course will enable instructors to import their Bb content as well as locate, create, and manipulate content in their Canvas temporary course shell: <https://ctl.unm.edu/instructors/support/workshops/index.html>
